

## MetWest High Yield Bond Fund

I SHARE: MWHIX | M SHARE: MWHYX

JULY 29  
2019  
SUMMARY  
PROSPECTUS

Before you invest, you may want to review the Fund's Prospectus which contains more information about the Fund and its risks. You can find the Fund's Prospectus, Statement of Additional Information and other information about the Fund online at [www.TCW.com](http://www.TCW.com). You can also get this information at no cost by calling 1-800-241-4671 or by sending an email request to [metwestclientservices@tcw.com](mailto:metwestclientservices@tcw.com). The Fund's current Prospectus and Statement of Additional Information, both dated July 29, 2019, are incorporated by reference into this Summary Prospectus. The Securities and Exchange Commission has not approved or disapproved these securities or passed on the adequacy of this prospectus. Any representation to the contrary is a criminal offense.

Beginning on January 1, 2021, as permitted by regulations adopted by the Securities and Exchange Commission, paper copies of the Funds' annual and semi-annual shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports. Instead, the reports will be made available on the Funds' website ([www.TCW.com](http://www.TCW.com)), and you will be notified by mail each time a report is posted and provided with a website link to access the report. If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. You may elect to receive shareholder reports and other communications electronically by contacting your financial intermediary (such as a broker-dealer, bank, or retirement plan), or by calling 1-800-241-4671 if you invest directly with the Funds.

You may elect to receive all future reports in paper free of charge. Contact your financial intermediary or, if you invest directly with the Funds, call 1-800-241-4671, to request that you continue receiving paper copies of your shareholder reports. Your election to receive reports in paper will apply to all Funds held through your financial intermediary or directly with TCW.

## METROPOLITAN WEST FUNDS

Supplement dated December 30, 2019 to the Prospectus dated July 29, 2019, as supplemented (the “Prospectus”)

*For current and prospective investors in the Metropolitan West High Yield Bond Fund (the “Fund”):*

Effective December 31, 2019, Tad Rivelle and Bryan Whalen will cease to be portfolio managers of the Fund, and Jerry Cudzil and Steven J. Purdy will be added to the portfolio management team of the Fund. Therefore, effective December 31, 2019, the disclosure under the heading “**Metropolitan West High Yield Bond Fund — Portfolio Managers**” on page 26 of the Prospectus is deleted in its entirety and replaced with the following:

Name	Experience with the Fund	Primary Title with Investment Adviser
Jerry Cudzil	Since December 2019	Managing Director
Stephen M. Kane	23 years	Founding Partner and Generalist Portfolio Manager
Laird R. Landmann	23 years	Founding Partner and Generalist Portfolio Manager
Steven J. Purdy	Since December 2019	Managing Director

In addition, effective December 31, 2019, the disclosure relating to Jerry Cudzil under the heading “**Management of the Funds – Portfolio Managers**” on page 94 of the Prospectus is deleted in its entirety and replaced with the following:

Jerry Cudzil Managing Director of the Adviser, has been with the Adviser since May 2012. Mr. Cudzil manages the Corporate Bond Fund, the Floating Rate Income Fund and the High Yield Bond Fund.

In addition, effective December 31, 2019, disclosure relating to Steven J. Purdy under the heading “**Management of the Funds – Portfolio Managers**” on page 94 of the Prospectus is added as follows:

Steven J. Purdy Managing Director of the Adviser since March 2016. Prior to joining TCW, Mr. Purdy was a Managing Director at TPG Capital and Goldman Sachs. Mr. Purdy manages the High Yield Bond Fund.

**Please retain this Supplement with your Prospectus for future reference.**

## Investment Objective

The High Yield Bond Fund seeks to maximize long-term total return consistent with preservation of capital.

## Fees and Expenses of the Fund

The table below describes the fees and expenses that you may pay if you buy and hold shares of the Fund. You may pay additional fees to broker-dealers or other financial intermediaries for the purchase of Class I shares of the Fund.

Shareholder Fees (Fees paid directly from your investment)

None.

Annual Fund Operating Expenses (Expenses that you pay each year as a percentage of the value of your investment)

	M Class	I Class
Management Fees .....	0.50%	0.50%
Distribution (12b-1) Fees .....	0.25%	None
Other Expenses .....	0.17%	0.13%
Shareholder Servicing Expenses <sup>1</sup> ....	0.09%	0.05%
Total Annual Fund Operating Expenses .....	0.92%	0.63%
Fee Waiver and/or Expense Reimbursement <sup>2</sup> .....	(0.07)%	(0.03)%
Total Annual Fund Operating Expenses after Fee Waiver and/or Expense Reimbursement .....	0.85%	0.60%

<sup>1</sup> The Fund is authorized to compensate broker-dealers and other third-party intermediaries up to 0.10% (10 basis points) of the M and I Class assets serviced by those intermediaries for shareholder services.

<sup>2</sup> Metropolitan West Asset Management, LLC (the "Adviser") has contractually agreed to reduce advisory fees and/or reimburse expenses, including distribution expenses, to limit the Fund's total annual operating expenses (excluding interest, taxes, brokerage commissions, short sale dividend expenses, swap interest expenses, acquired fund fees and expenses, and any expenses incurred in connection with any merger or reorganization or extraordinary expenses such as litigation) to the net expenses shown in the table for the applicable class. The Adviser may recoup reduced fees and expenses only within three years, provided that the recoupment does not cause the Fund's annual expense ratio to exceed the lesser of (i) the expense limitation applicable at the time of that fee waiver and/or expense reimbursement or (ii) the expense limitation in effect at the time of recoupment. This contract will remain in place until July 31, 2020. Although it does not expect to do so, the Board of Trustees is permitted to terminate that contract sooner in its discretion with written notice to the Adviser.

## Example

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. The cost for the Fund reflects the net expenses of the Fund that result from the contractual expense limitation in the first year only (through July 31, 2020). Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Class M .....	\$87	\$286	\$502	\$1,125
Class I .....	\$61	\$199	\$348	\$ 783

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 120% of the average value of its portfolio.

## Principal Investment Strategies

The Fund pursues its objective by investing, under normal circumstances, at least 80% of its net assets, plus any borrowings for investment purposes, in high yield bonds (commonly known as "junk bonds"), which are bonds rated below investment grade or unrated bonds determined by the Adviser to be of comparable quality. The remainder of the Fund's net assets may be invested in investment grade securities rated by one of the nationally recognized statistical rating organizations or, if unrated, determined by the Adviser to be of comparable quality.

Under normal circumstances, the Fund's portfolio duration is two to eight years and the Fund's dollar-weighted average maturity ranges from two to fifteen years. Duration is a measure of the expected life of a fixed income security that is used to determine the sensitivity of a security to changes in interest rates. The Fund invests in the U.S. and abroad, including emerging markets, and may purchase securities of

varying maturities issued by domestic and foreign corporations and governments. The Adviser focuses the Fund's portfolio holdings in areas of the bond market that the Adviser believes to be relatively undervalued, based on its analysis of quality, sector, coupon or maturity, and that the Adviser believes offer attractive prospective risk-adjusted returns compared to other segments of the bond market. The Fund may invest up to 25% of its assets in foreign securities that are denominated in U.S. dollars. The Fund may invest up to 15% of its assets in securities of foreign issuers that are not denominated in U.S. dollars. The Fund may invest up to 10% of its assets in emerging market securities.

The Fund's investments include various types of bonds and debt securities, including corporate bonds, mezzanine investments, swaps (including credit default swaps), currency futures and options, bank loans, preferred stock, mortgage-related and asset-backed securities (including collateralized debt obligations, which in turn include collateralized bond obligations and collateralized loan obligations), foreign securities, U.S. Treasuries and agency securities, private placements, defaulted debt securities and restricted securities, cash and cash equivalents; and common stocks or other equity securities, such as warrants. The Fund's fixed income investments may have interest rates that are fixed, variable or floating.

Derivatives are used in an effort to hedge investments, for risk management, or to increase income or gains for the Fund. The Fund may also seek to obtain market exposure to the securities in which it invests by entering into a series of purchase and sale contracts or by using other investment techniques such as reverse repurchase agreements. The Fund may normally borrow or short sell up to 33<sup>1/3</sup>% of the value of its total assets.

## Principal Risks

**Because the Fund holds securities with fluctuating market prices, the value of the Fund's shares will vary as its portfolio securities increase or decrease in value. Therefore, the value of your investment in the Fund could go down as well as up. You can lose money by investing in the Fund.**

The principal risks affecting the Fund that can cause a decline in value are:

- Debt Securities Risk: the risk that the value of a debt security may increase or decrease as a result of various factors, including changes in interest rates, actual or perceived inability or unwillingness of issuers to make principal or interest payments, market fluctuations and illiquidity in the debt securities market.
- Market Risk: the risk that returns from the securities in which the Fund invests may underperform returns from the general securities markets or other types of securities.
- Junk Bond Risk: the risk that junk bonds have a higher degree of default risk and may be less liquid and subject to greater price volatility than investment grade bonds.
- Interest Rate Risk: the risk that debt securities may decline in value because of changes in interest rates.
- Credit Risk: the risk that an issuer may default in the payment of principal and/or interest on a security.
- Price Volatility Risk: the risk that the value of the Fund's investment portfolio will change as the prices of its investments go up or down.
- Issuer Risk: the risk that the value of a security may decline for reasons directly related to the issuer such as management performance, financial leverage and reduced demand for the issuer's goods or services.
- Liquidity Risk: the risk that lack of a ready market or restrictions on resale may limit the ability of the Fund to sell a security at an advantageous time or price. In addition, the Fund, by itself or together with other accounts managed by the Adviser, may hold a position in a security that is large relative to the typical trading volume for that security, which can make it difficult for the Fund to dispose of the position at an advantageous time or price. Although the Fund is normally able to sell loans within seven days, a substantial portion of the loans held by the Fund may also experience delayed settlement beyond that period, which can impair the ability of the Fund to pay redemptions or to re-invest proceeds, or may require the Fund to borrow to meet redemptions. Over recent years, the fixed-income markets have grown more than the ability of dealers to make markets, which can further constrain liquidity and increase the volatility of portfolio valuations. High levels of redemptions in bond funds in response to market conditions could cause greater losses as a result. Regulations such as the Volcker Rule or future regulations may further constrain the ability of market participants to create liquidity, particularly in times of increased market volatility. The liquidity of the Fund's assets may change over time.
- Frequent Trading Risk: the risk that frequent trading may lead to increased portfolio turnover and higher transaction costs, which may reduce the Fund's performance and may cause higher levels of current tax liability to shareholders of the Fund.

- Valuation Risk: the risk that the portfolio instruments may be sold at prices different from the values established by the Fund, particularly for investments that trade in low volume, in volatile markets or over the counter or that are fair valued.
- Unrated Securities Risk: the risk that unrated securities may be less liquid than comparable rated securities, and the risk that the Adviser may not accurately evaluate the security's comparative credit rating.
- Distressed and Defaulted Securities Risk: the risk that the repayment of defaulted securities and obligations of distressed issuers is subject to significant uncertainties.
- Leverage Risk: the risk that leverage may result from certain transactions, including the use of derivatives and borrowing. This may impair the Fund's liquidity, cause it to liquidate positions at an unfavorable time, increase its volatility or otherwise cause it not to achieve its intended result. To the extent required by applicable law or regulation, the Fund will reduce leverage risk by either segregating an equal amount of liquid assets or "covering" the transactions that introduce such risk.
- Counterparty Risk: the risk that the other party to a contract, such as a derivatives contract, may not fulfill its contractual obligations.
- Derivatives Risk: the risk of investing in derivative instruments, which includes liquidity, interest rate, market, credit and management risks as well as risks related to mispricing or improper valuation. Changes in the value of a derivative may not correlate perfectly with the underlying asset, reference rate or index, and the Fund could lose more than the principal amount invested. These investments can create investment leverage and may create additional risks that may subject the Fund to greater volatility and less liquidity than investments in more traditional securities.
- Futures Contracts Risk: the risk of investing in futures contracts, which includes (1) the imperfect correlation between a futures contract and the change in market value of the underlying instrument held by the Fund; (2) a high degree of leverage because of the low collateral deposits normally involved in futures trading; (3) possible lack of a liquid secondary market for a futures contract and the resulting inability to close a futures contract when desired; (4) losses caused by unanticipated market movements, which are potentially unlimited; and (5) the inability of the Fund to execute a trade because of the maximum permissible price movements exchanges may impose on futures contracts.
- Swap Agreements Risk: the risk of investing in swaps, which, in addition to risks applicable to derivatives generally, includes: (1) the inability to assign a swap contract without the consent of the counterparty; (2) potential default of the counterparty to a swap for those not traded through a central counterparty; (3) absence of a liquid secondary market for any particular swap at any time; and (4) possible inability of the Fund to close out a swap transaction at a time that otherwise would be favorable for it to do so.
- Bank Loan Risk: the risk of investing in corporate loans made by commercial banks and other financial institutions or institutional investors to companies that need capital to grow or restructure, which includes interest rate risk, liquidity risk and prepayment risk. The Fund may also be subject to the credit risk of other financial institutions and the risks associated with insufficient collateral securing a bank loan, limited available public information about a bank loan, delayed settlement, and less protection for holders of bank loans as compared to holders of registered securities.
- Foreign Investing Risk: the risk that Fund share prices will fluctuate with market conditions, currency exchange rates and the economic and political climates of the foreign countries in which the Fund invests or has exposure. Investments in foreign securities may involve greater risks than investing in U.S. securities due to, among other factors, less publicly available information, less stringent and less uniform accounting, auditing and financial reporting standards, less liquid and more volatile markets, higher transaction and custody costs, additional taxes, less investor protection, delayed or less frequent settlement, political or social instability, civil unrest, acts of terrorism, and regional economic volatility.
- Foreign Currency Risk: the risk that foreign currencies may decline in value relative to the U.S. dollar and affect the Fund's investments in foreign currencies, in securities that are denominated, trade and/or receive revenues in foreign currencies, or in derivatives that provide exposure to foreign currencies.
- Emerging Markets Risk: the risk of investing in emerging market countries, which is substantial due to, among other factors, higher brokerage costs in certain countries; different accounting standards; thinner trading markets as compared to those in developed countries; the possibility of currency transfer restrictions; and the risk of expropriation, nationalization or other adverse political, economic or social developments.

- **Short Sales Risk:** the risk that the use of short sales, which are speculative investments, may cause the Fund to lose money if the value of a security does not go down as the Adviser expects. The risk of loss is theoretically unlimited if the value of the security sold short continues to increase. In addition, the use of borrowing and short sales may cause the Fund to have higher expenses (especially interest and dividend expenses) than those of other mutual funds that do not engage in short sales.
- **U.S. Government Securities Risk:** the risk that debt securities issued or guaranteed by certain U.S. government agencies, instrumentalities, and sponsored enterprises are not supported by the full faith and credit of the U.S. government, and as a result, investments in their securities or obligations issued by such entities involve credit risk greater than investments in other types of U.S. government securities.
- **Securities Selection Risk:** the risk that the securities held by the Fund may underperform those held by other funds investing in the same asset class or those included in benchmarks that are representative of the same asset class because of the portfolio managers' choice of securities.
- **Portfolio Management Risk:** the risk that an investment strategy may fail to produce the intended results.
- **Prepayment Risk:** the risk that in times of declining interest rates, the Fund's higher yielding securities may be prepaid and the Fund may have to replace them with securities having a lower yield.
- **Extension Risk:** the risk that in times of rising interest rates, borrowers may pay off their debt obligations more slowly, causing securities considered short or intermediate term to become longer-term securities that fluctuate more widely in response to changes in interest rates than shorter term securities.
- **Mezzanine Securities Risk:** the risk of investing in mezzanine securities, which generally are rated below investment grade or are unrated and present many of the same risks as senior loans, second lien loans and non-investment grade bonds. Mezzanine securities present additional risks because they typically are the most subordinated debt obligation in an issuer's capital structure and are often unsecured. Mezzanine securities are also expected to be a highly illiquid investment.

Please see "Principal Risks" and "Other Risks" for a more detailed description of the risks of investing in the Fund.

Your investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency, entity, or person.

## Performance Information

The following bar chart and table provide some indication of the risks of investing in the Fund. The bar chart shows changes in the Fund's performance from year to year. The bar chart shows performance of the Fund's Class M shares. Class M performance is lower than Class I performance because Class I has lower expenses than Class M. The table compares the average annual total returns of the Fund to a broad-based securities market index. Total returns would have been lower if certain fees and expenses had not been waived or reimbursed. The inception dates of Class M shares and Class I shares of the Fund are September 30, 2002 and March 31, 2003, respectively. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Updated performance information for the Fund is available on our website at [www.tcw.com](http://www.tcw.com) or by calling (800) 241-4671.

High Yield Bond Fund – Class M Shares  
Annual Total Returns for Years Ended 12/31

Year-to-Date Total Return of Class M Shares as of June 30, 2019: 9.22%

**Highest:** 21.58% (quarter ended June 30, 2009)  
**Lowest:** -8.55% (quarter ended September 30, 2011)

## Average Annual Total Returns

(For Periods Ended December 31, 2018)

Share Class	1 Year	5 Years	10 Years	Since Inception
M – Before Taxes . . . .	-1.27%	2.12%	9.14%	7.82%
- After Taxes on Distributions . . .	-2.91%	0.33%	6.52%	4.79%
- After Taxes on Distributions and Sale of Fund Shares . . . . .	-0.74%	0.83%	6.24%	4.94%
I – Before Taxes . . . . .	-0.93%	2.40%	9.42%	7.17%
Barclays Capital U.S. Corporate High Yield Index – 2% Issuer Cap . . . .	-2.08%	3.84%	11.14%	8.52%

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. After-tax returns are shown for only Class M Shares. After-tax returns for other classes will vary. In some cases, returns after taxes on distributions and sale of Fund shares may be higher than returns before taxes because the calculations assume that the investor received a tax deduction for any loss incurred on the sale of the shares.

## Investment Adviser

Metropolitan West Asset Management, LLC.

## Portfolio Managers

Name	Experience with the Fund	Primary Title with Investment Adviser
Stephen M. Kane, CFA	23 Years	Founding Partner and Generalist Portfolio Manager
Laird Landmann	23 Years	Founding Partner and Generalist Portfolio Manager
Tad Rivelle	Since December 2018	Founding Partner, Chief Investment Officer and Generalist Portfolio Manager
Bryan T. Whalen, CFA	Since December 2018	Generalist Portfolio Manager

## Purchase and Sale of Fund Shares

You may purchase or redeem shares of the Funds on any business day (normally any day that the New York Stock Exchange is open). Generally, purchase and redemption orders for shares of the Funds are processed at the net asset value next calculated after an order is received by the Fund. You may conduct transactions by mail (Metropolitan West Funds, c/o BNY Mellon Investment Servicing, P.O. Box 9793, Providence, RI 02940), or by telephone at (800) 241-4671. You may also purchase or redeem shares of the Funds through your dealer or financial advisor. Plan Class shares offered by the Total Return Bond Fund are intended for retirement plans, including defined benefit and defined contribution plans (which may include participant-directed plans).

## Purchase Minimums for Each Share Class

The following table provides the minimum initial and subsequent investment requirements for each share class. The minimums may be reduced or waived in some cases. A broker-dealer or other financial intermediary may require a higher minimum initial investment, or may aggregate or combine accounts in order to allow its customers to apply a lower minimum investment.

Share Class and Type of Account	Minimum Initial Investment	Minimum Subsequent Investment
<b>Class M</b>		
Regular Accounts . . . . .	\$ 5,000	\$ 0
Individual Retirement Accounts . . . . .	\$ 1,000	\$ 0
Automatic Investment Plan . . . . .	\$ 5,000	\$ 100
<b>Class I</b>		
Regular Accounts . . . . .	\$3,000,000	\$50,000

## Tax Information

Dividends and capital gains distributions you receive from the Fund are subject to federal income taxes and may also be subject to state and local taxes, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account. Such tax-deferred arrangements may be taxed later upon withdrawal from those arrangements.

## Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and/or the Adviser may, directly or through the Fund's principal underwriter, pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information. Plan Class shares do not make payments to broker-dealers or other financial intermediaries.
