¹ Since inception returns include the performance of the predecessor limited partnership for periods before the Fund's registration became effective. The predecessor limited partnership was not registered under the Investment Company Act of 1940 ("1940 Act") and therefore, was not subject to certain investment restrictions imposed by the 1940 Act. If the limited partnership was registered under the 1940 Act, its performance may have been adversely affected. ² Portfolio characteristics and holdings are subject to change at any time. ³ It should not be assumed that an investment in the securities listed was or will be profitable. ⁴ Russell 1000® Growth Index: Measures the performance of those Russell 1000 companies with higher price-to-book ratios and higher forecasted growth values. The index is not available for direct investment; therefore its performance does not reflect a reduction for fees or expenses incurred in managing a portfolio. The securities in the index may be substantially different from those in the Fund. London Stock Exchange Group plc and its group undertakings (collectively, the "LSE Group"). © LSE Group 2018. FTSE Russell is a trading name of certain of the LSE Group companies. Russell® is a trade mark(s) of the relevant LSE Group companies and is/are used by any other LSE Group company under license. All rights in the FTSE Russell indexes or data vest in the relevant LSE Group company which owns the index or the data. Neither LSE Group nor its licensors accept any liability for any errors or omissions in the indexes or data and no party may rely on any indexes or data contained in this communication. No further distribution of data from the LSE Group is permitted without the relevant LSE Group company's express written consent. The LSE Group does not promote, sponsor or endorse the content of this communication. ⁵ The annualized since inception return for the index reflects the inception date of the Class I and Class N Share Funds, respectively. For periods 7/1/91-6/30/19; 2/26/99-6/30/19.

Investment Objective and Approach

The Fund's investment objective is to seek to provide long-term capital appreciation.

The Fund invests primarily in the common stocks of mid and large capitalization companies. A highly focused approach is employed which seeks to achieve strong long-term returns over a full market cycle.

There is no assurance that the objectives and/or trends will come to pass or be maintained.

Overall Morningstar RatingTM

I Share rating based on risk-adjusted returns among 1,235 funds in the Large Growth category as of 6/30/19.

The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its 3-, 5-, and 10-year (if applicable) Morningstar Rating metrics.

[†]See important Morningstar RatingTM disclosures on the next page.

Expense Ratio (%)

	I Share	N Share
Gross	0.77	1.05
Net*	0.77	1.00

Annual fund operating expenses as stated in the Prospectus dated February 28, 2019, excluding interest and acquired fund fees and expenses, if any.

* Effective January 1, 2019, the Fund's investment advisor has agreed to waive fees and/or reimburse expenses to limit the Fund's total annual operating expenses (excluding interest, brokerage, extraordinary expenses and acquired fund fees and expenses, if any) to 0.80% of average daily net assets with respect to Class I shares and 1.00% of average daily net assets with respect to Class N shares. This contractual fee waiver/expense reimbursement will remain in place through March 1, 2020 and may be terminated by the investment adviser, or extended or modified with approval of the Board of Directors.

The performance data presented represents past performance and is no guarantee of future results. Total returns include reinvestment of dividends and distributions. Current performance may be lower or higher than the performance data presented. Performance data current to the most recent month end is available on the Fund's website at TCW.com. Investment returns and principal value will fluctuate with market conditions. The value of an investment in the Fund, when redeemed, may be worth more or less than its original purchase cost.

You should consider the investment objectives, risks, charges and expenses of a mutual fund carefully before investing. A Fund's Prospectus and Summary Prospectus contain this and other information about the Fund. To receive a Prospectus, please call 800-386-3829 or you may download the Prospectus from the Fund's website at TCW.com. Please read it carefully.

TCW Select Equities Fund

Portfolio Manager

Craig C. Blum, CFA

Our Firm

TCW is a leading global asset management firm with more than four decades of investment experience and a broad range of products across fixed income, equities, emerging markets and alternative investments. Through the TCW and MetWest Fund Families, TCW manages one of the largest mutual fund complexes in the U.S. TCW's clients include many of the world's largest corporate and public pension plans, financial institutions, endowments and foundations, as well as financial advisors and high net worth individuals. As of June 30, 2019, TCW had total assets under management, including commitments, of \$205 billion. TCW is headquartered in Los Angeles, and has offices in New York, Boston, Chicago, London, Milan, Hong Kong, and Tokyo.

MORNINGSTAR DISCLOSURE

© 2019 Morningstar, Inc. All Rights Reserved. The information contained herein: (1) is proprietary to Morningstar; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results.

The Morningstar Rating™ for funds, or “star rating”, is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Morningstar Overall Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. The total number of Large Growth Funds for the 3-, 5-, and 10-year time periods were 1,235, 1,100, and 812, respectively. The TCW Select Equities Fund I Share received a rating of 4 stars for the 3- and 5-year periods, and 3 stars for the 10-year period.

TCW Select Equities Fund

INVESTMENT RISKS

Equity Risk – Equity investments entail equity risk and price volatility risk. The value of stocks and other equity securities will generally fluctuate and may decline in value over short or extended periods based on changes in a company's financial condition and in overall market and economic conditions. **Foreign Investing Risk** – Investments in foreign securities generally involve higher costs than investments in U.S. securities, including higher transaction and custody costs as well as additional taxes imposed by foreign governments. In addition, security trading practices abroad may offer less protection to investors such as the Funds, and foreign countries typically impose less thorough regulations on brokers, dealers, stock exchanges, corporate insiders and listed companies than does the U.S. **Growth Investing Risk** – Growth stocks may be more volatile than other stocks because they are more sensitive to investor perceptions of the issuing company's growth potential. **Information Technology Sector Risk** – Companies in the information technology sector may be affected by the overall economic conditions as well as by factors particular to the information technology sector. **Issuer Risk** – The value of securities held by a Fund may decline for a number of reasons directly related to an issuer, such as changes in the financial condition of the issuer, management performance, financial leverage and reduced demand for the issuer's goods or services. **Liquidity Risk** – A Fund's investments in illiquid securities may reduce the returns of the Fund because it may not be able to sell the illiquid securities at an advantageous time or price. **Market Risk** – Returns from the securities in which a Fund invests may underperform returns from the various general securities markets or different asset classes. Adverse events in an issuer's performance or financial position can depress the value of its securities, as can liquidity and the depth of the market for that security, a market's current attitudes about types of securities, market reactions to political or economic events, including litigation, and tax and regulatory effects (including lack of adequate regulations and federal, state and other government and regulatory intervention to regulate or support institutions, markets and Funds). **Mid-Capitalization Company Risk** – Mid-capitalization companies are generally more likely to experience business failures than large-capitalization companies, and the stocks of mid-capitalization companies may be less liquid. **Portfolio Management Risk** – Portfolio management risk is the risk that an investment strategy may fail to produce the intended results. **Price Volatility Risk** – The value of a Fund's investment portfolio will change as the prices of its investments go up or down. The Funds that invest primarily in the equity securities of small- and/or mid-capitalization companies are generally subject to greater price volatility than mutual funds that primarily invest in large companies. The fewer the number of issuers in which a Fund invests, the greater the potential volatility of its portfolio. **Securities Selection Risk** – The specific securities held in a Fund's investment portfolio may underperform those held by other funds investing in the same asset class or benchmarks that are representative of the asset class because of a portfolio manager's choice of securities. *Please see the Fund's Prospectus for more information on these and other risks.*

GLOSSARY OF TERMS

Average Price/Earnings – The price/earnings ratio is the price of a stock divided by its earnings per share. P/E ratio estimates should not be considered illustrative of future performance of the Fund. **Debt/Equity Ratio** – A measure of a company's financial leverage calculated by dividing its total liabilities by stockholders' equity. **Dividend** – A distribution of a portion of a company's earnings, decided by the board of directors, to a class of its shareholders. **Market Capitalization** – Represents the aggregate value of a company or stock. It is obtained by multiplying the number of shares outstanding by their current price per share. **PEG Ratio** – **The PEG Ratio** (price/earnings to growth ratio) is a valuation metric for determining the relative trade-off between the price of a stock, the earnings generated per share (EPS), and the company's expected growth. **Portfolio Turnover** – A measure of how frequently assets within a fund are bought and sold by the managers. Portfolio turnover is calculated by taking either the total amount of new securities purchased or the amount of securities sold – whichever is less – over a particular period, divided by the total net asset value (NAV) of the fund. The measurement is usually reported for a 12-month time period. **Price-to-Sales** – A ratio for valuing a stock relative to its own past performance, other companies or the market itself. **Volatility** – The propensity of the value of an asset or market to rise or fall.
