

Characteristics (%)

	Fund	Index ¹
Average Maturity (Years)	7.56	8.87
Effective Duration (Years)	7.24	7.12
30-Day SEC Yield I Class	3.26%	—
30-Day SEC Yield N Class	3.16%	—
Average Convexity (Years)	0.38	0.83
Average Price	\$104.56	\$108.89

The SEC yield is the average annualized net investment income per share for the 30-day period ended on the last day of the month. The yields for the I and N Share Class would have been 2.05% and 1.72% respectively, if the contractual fee waiver and/or expense reimbursement did not apply.

¹ Bloomberg Barclays Global Aggregate Bond Index: Provides a broad-based measure of the global investment grade fixed-rate debt markets. The index is not available for direct investment; therefore its performance does not reflect a reduction for fees or expenses incurred in managing a portfolio. The securities in the index may be substantially different from those in the Fund. ² Includes Agency and Supranational securities. ³ Includes options, futures, forwards, swaps and equities. ⁴ U.S. Treasuries bucket include all securities backed by the full faith and credit of the U.S. Government.

Negative allocations are due to unsettled month-end trades.

You should consider the investment objectives, risks, charges and expenses of a mutual fund carefully before investing. A Fund's Prospectus and Summary Prospectus contain this and other information about the Fund. To receive a Prospectus, please call 877-829-4768 or you may download the Prospectus from the Funds' website at TCW.com. Please read it carefully.

Annual fund operating expenses as stated in the Prospectus dated February 28, 2019, excluding interest and acquired fund fees and expenses, if any.

Source: TCW, State Street B&T

¹ For period 11/30/11 – 12/31/19.

² Effective February 28, 2019, the Fund's investment advisor has agreed to waive fees and/or reimburse expenses to limit the Fund's total annual operating expenses (excluding interest, brokerage, extraordinary expenses and acquired fund fees and expenses, if any) to 0.60% of average daily net assets with respect to Class I shares and 0.70% of average daily net assets with respect to Class N shares. This contractual fee waiver/performance reimbursement will remain in place through March 1, 2020 and may be terminated by the investment adviser, or extended or modified with approval of the Board of Directors.

The performance data presented represents past performance and is no guarantee of future results. Total returns include reinvestment of dividends and distributions. Current performance may be lower or higher than the performance data presented. Performance data current to the most recent month end is available on the Fund's website at TCW.com. Investment returns and principal value will fluctuate with market conditions. The value of an investment in the Fund, when redeemed, may be worth more or less than its original purchase cost.

The credit quality of the investments in the portfolio does not apply to the stability or safety of the Fund. TCW receives credit quality ratings on the underlying securities held by the fund from Moody's, Standard & Poors and Fitch. TCW created the "Quality Distribution" breakdown by taking the highest rating of the three agencies when two or three of the agencies rate a security. If only one agency rated a security, TCW will use that rating. Quality Distribution UST/AGY % includes mortgage- and asset-backed securities that are issued by the U.S. Government and government agencies. Gradations of creditworthiness are indicated by rating symbols with each symbol representing a group in which the credit characteristics are broadly the same. Credit quality ratings may be expressed in Standard & Poor's or Fitch's nomenclature, which range from AAA (extremely strong capacity to meet its financial commitments; highest rating) to D (payment default on financial commitments); or may be expressed in Moody's nomenclature, which range from Aaa (highest) to C (lowest). The Unrated category contains bonds that are not rated by a nationally recognized statistical rating organization. Credit quality ratings are subject to change and pertain to the underlying holdings of the Fund and not the Fund itself.

Investment Risks

It is important to note that the Fund is not guaranteed by the U.S. Government. Fixed income investments entail interest rate risk, the risk of issuer default, issuer credit risk, and price volatility risk. Funds investing in bonds can lose their value as interest rates rise and an investor can lose principal. Mortgage-backed and other asset-backed securities often involve risks that are different from or more acute than risks associated with other types of debt instruments. MBS related to floating rate loans may exhibit greater price volatility than a fixed rate obligation of similar credit quality. With respect to non-agency MBS, there are no direct or indirect government or agency guarantees of payments in pools created by non-governmental issuers. Non-agency MBS are also not subject to the same underwriting requirements for the underlying mortgages that are applicable to those mortgage-related securities that have a government or government-sponsored entity guarantee. Fund share prices and returns will fluctuate with market conditions, currencies, and the economic and political climates where the investments are made. Emerging markets securities carry special risks, such as less developed or less efficient trading markets, a lack of company information, and differing auditing and legal standards. The securities markets of emerging markets countries can be extremely volatile. The Fund's investments denominated in foreign currencies will decline in value if the foreign currency declines in value relative to the U.S. dollar. *Please see the Fund's Prospectus for more information on these and other risks.*

Glossary of Terms

Agency MBS – The purchase of mortgage-backed securities issued by government-sponsored enterprises such as Ginnie Mae, Fannie Mae or Freddie Mac. **Asset-Backed Securities** – A financial security backed by a loan, lease or receivables against assets other than real estate and mortgage-backed securities. **Cash & Equivalents** – The assets include but are not limited to Discount Notes, Commercial Paper, Money Market Funds, STIFs, Certificates of Deposit, T-bills, Tri-Party Repo, US Treasury and Agency Notes within 13 months to maturity, and cash. While management generally believes that most, possibly all, of the cash and equivalents would be available on a same day or next day basis under stable market conditions, we cannot predict the impact of any adverse developments in market conditions that might occur. **CMBS** (Commercial Mortgage-Backed Securities) – A debt obligation that represents claims to the cash flows from pools of mortgage loans on commercial property. **Convexity** – A measure of the curvature in the relationship between bond prices and bond yields that demonstrates how the duration of a bond changes as the interest rate changes. **Corporate** – Of or relating to a bond issued by a corporation as opposed to a bond issued by the U.S. Treasury, a non-U.S. government or a municipality. **Credit Quality** – One of the principal criteria for judging the investment quality of a bond or bond mutual fund. **Default** – The failure to perform on a futures contract as required by an exchange. **Developed Market** – Countries that have sound, well-established economies and are therefore thought to offer safer, more stable investment opportunities than developing markets. **Dividend** – A distribution of a portion of a company's earnings, decided by the board of directors, to a class of its shareholders. **Duration** – A measure of the sensitivity of the price (the value of principal) of a fixed-income investment to a change in interest rates. Duration is expressed as a number of years. Rising interest rates mean falling bond prices, while declining interest rates mean rising bond prices. **Emerging Market (EM)** – A country that has some characteristics of a developed market but is not a developed market. This includes countries that may be developed markets in the future or were in the past. **Floating Rate** – Any interest rate that changes on a periodic basis. The change is usually tied to movement of an outside indicator, such as the prime interest rate. **High Yield** – A bond that is rated below investment grade. **Investment Grade (IG)** – A bond that is rated Baa3/BBB- or higher by Moody's, Standard & Poors and Fitch. **Maturity** – The period of time for which a financial instrument remains outstanding. **MBS** (Mortgage-Backed Securities) – A type of asset-backed security that is secured by a mortgage or collection of mortgages. These securities must also be grouped in one of the top two

TCW Global Bond Fund

ratings as determined by a accredited credit rating agency, and usually pay periodic payments that are similar to coupon payments. Furthermore, the mortgage must have originated from a regulated and authorized financial institution. **Municipal Bond** – A bond issued by a local government, or their agencies. **Non-Agency MBS** – Mortgage backed securities sponsored by private companies other than government sponsored enterprises such as Fannie Mae or Freddie Mac. **Sovereign** – A national government within a given country. This material is for general information purposes only. There can be no assurance that the objectives and/or trends will come to pass or be maintained. This material may include estimates, projections and other “forward-looking” statements. Actual events may differ substantially from those presented. TCW assumes no duty to update any such statements. Projections are based on current asset prices and are subject to change. **Supranational** – An international organization, or union, whereby member states transcend national boundaries or interests to share in the decision-making and vote on issues pertaining to the wider grouping. **U.S. Treasuries** – Bills, notes and bonds that are debt obligations of the U.S. government. **Volatility** – The propensity of the value of an asset or market to rise or fall. **Yield** – The income return on an investment. This refers to the interest or dividends received from a security and is usually expressed annually as a percentage based on the investment’s cost, its current market value or its face value.
